

HEALTH AND COMMUNITY PARTNERSHIPS

Project X Transformation is looking for healthcare and community partners upon which to build our programs and fulfill our mission statement. Our partnerships are formed in a number of ways:

- Placing COVID Rapid Response Testing Kits with health providers in distressed communities
- Partnering with medical clinics to provide medical devices to their insured patients
- Providing monitoring services via secure portal to insured patients
- Teaming up with corporate partners to provide devices and monitoring to the uninsured
- Partnering with community organizations to identify patients who are in need of these devices and conducting health workshops to bring awareness to this new technology.

These partnerships bring a new level of awareness and participation never seen before in healthcare. Both the patient and the physician have the tools to see clinical information immediately. This is the perfect solution for the patient/physician relationship in the current COVID-19 era.

We invite you to partner with us in bringing these devices and technology to distressed communities everywhere. Reach out to us to bridge the healthcare gap and lower overall healthcare costs through information, education and resource allocation.

Sincerely,

Moe Woodard
